List of Administration 28
Education is a matter of life and death to our nation. The world is moving so fast that if you do not educate yourselves you will be not only completely left behind, but will be finished up.

The Holy Prophet (PBUH) had enjoined his followers to go even to China in the pursuit of knowledge. If that was the commandment in those days when communications were difficult, then, truly, Muslims as the true followers of the glorious heritage of Islam, should surely utilize all available opportunities. No sacrifice of time or personal comfort should be regarded too great for the advancement of the cause of education.

Quaid-e-Azam Mohammad Ali Jinnah
January, 1945
Message of the Vice Chancellor

We at University of Veterinary and Animal Sciences, Lahore have an entrepreneurial spirit. Our programs and services are driven by the needs of our community industry and economy. We have dramatically expanded our undergraduate and postgraduate programs to offer degrees in areas of workforce demand such as poultry science, bioinformatics, fisheries & wildlife, dairy technology, applied microbiology, we also offer MBA in life sciences, M.Phil and PhD programs in wildlife, fisheries, dairy technology. In today's business environment everything is rapidly being commercialized. Starting from general business to health services every sector has come under the ambit of business. So the professionals working in fields of health sciences, animal sciences, pharmaceuticals, agriculture and other life services need to have a deep insight of business administration. The MBA degree holders have unlimited avenues to excel in their career.

Earning your Master of Business Administration degree in Life Sciences is the start to a career in business planning to negotiations, managing budgets, creating market plans, establishing key performance metrics, and functioning in multiple professional roles as part of a life sciences team. This program prepares professionals with business skills specific to the industry. The participants earn MBA degree that is designed to help them gain the experience and business skills to assume leadership roles in the field.

I welcome the students joining MBA life sciences program to this prestigious professional University, I am sure that you will find conducive environment for learning, training and skill development. I wish you best of luck in your future endeavors.

Prof. Dr. Muhammad Nawaz
Vice Chancellor
Message from Dean, FLSBM

It is my pleasure to offer MBA (Life Sciences) degree program. This program is being offered first time in Pakistan. The Faculty of Life Sciences Business Management is working hard to promote business education in concerned professionals.

As all the Life Science graduates have to work in business environment because of transition of every profession to business approach. Same is true for our Livestock and Poultry sectors. As both of these sectors are growing with a fast pace, resultantly there is an enormous increase of need for skilled manpower in these professions. Keeping in view these needs Faculty of Life Sciences Business Management (FLSBM) has initiated MBA (Life Sciences) degree program which will provide all the necessary business skills needed by Life Sciences professionals.

The Faculty arranges guest speakers to provide students, chances to connect their theoretical knowledge with practical knowledge of business practitioners. By using innovative learning techniques the faculty will do their best to produce future business leaders for Life Science fields. I wish you best of luck.

Prof. Dr. M. Aleem
Dean, FLSBM
Director's Message

Welcome to the Department of Management Studies (DMS) at University of Veterinary and Animal Sciences. MBA Life Sciences is one of the unique programs. In spite of structural shift towards industrialization, Agriculture sector in Pakistan is still the largest sector of the economy with deep impact on socio-economic set up.

According to the Financial Times, the world faces a permanent crisis and global instability unless countries act now to feed surging population by doubling agricultural output by 2050. Keeping in view of the future national and global food demand, UVAS put forward its vision to strengthen the Pakistan’s economy and bring agricultural competitiveness in the region. Our two years morning and evening MBA programs offer a unique combination of traditional management modules with industry driven specialization routes.

Students are encouraged to participate in workshops, seminars and training sessions. DMS invites business professionals from real world to impart their practical knowledge and share personal experiences.

Our main focus is not only to train our students academically but their personal grooming is also very central to us. Highly qualified faculty, rigorously selected students and professionally trained staff are our main features.

Good Luck!

Syed Sadir Ali Zaidi
Director, DMS
Historical Perspective

The University of Veterinary and Animal Sciences, Lahore, is one of the oldest Veterinary Institutions in Asia. Since its inception in 1882, this institution offered a wide range of programs that have effectively catered the educational and training needs in the field of Veterinary and Animal Sciences. By now it has emerged as one of the famous centers of teaching in Veterinary Education in Asia.

This Institution started as Veterinary School in 1882 and was raised to the status of Punjab Veterinary College by the end of nineteenth century. Its present buildings were completed in 1921. In 1942, the College was affiliated with the Punjab University, Lahore. In 1971, this College was integrated with the University of Agriculture, Faisalabad. The Upgradation of College of Veterinary Sciences, Lahore to the status of a University in June 2002, was an obvious testimony of commitment of the Government regarding institutional arrangement for further research, higher education, human resource development and poverty alleviation.

Academic Hierarchy of UVAS
Faculty of Life Sciences Business Management

a step toward self sustainability

Faculty of Life Sciences Business Management is one of the emerging Faculty of University of Veterinary and Animal Sciences Lahore. This Faculty has a vision to promote Business Management education in Life Science fields. This Faculty has been offering various undergraduate and postgraduate courses.
